

UKCA Mark

What is the UKCA Mark?

The UKCA (UK Conformity Assessed) marking is a new UK product marking used for goods being placed on the market in Great Britain (England, Wales and Scotland). It covers most goods which previously required the CE marking.

The Northern Ireland market will continue to meet relevant EU rules including CE marking or UKNI marking. Further guidance can be [found here](#).

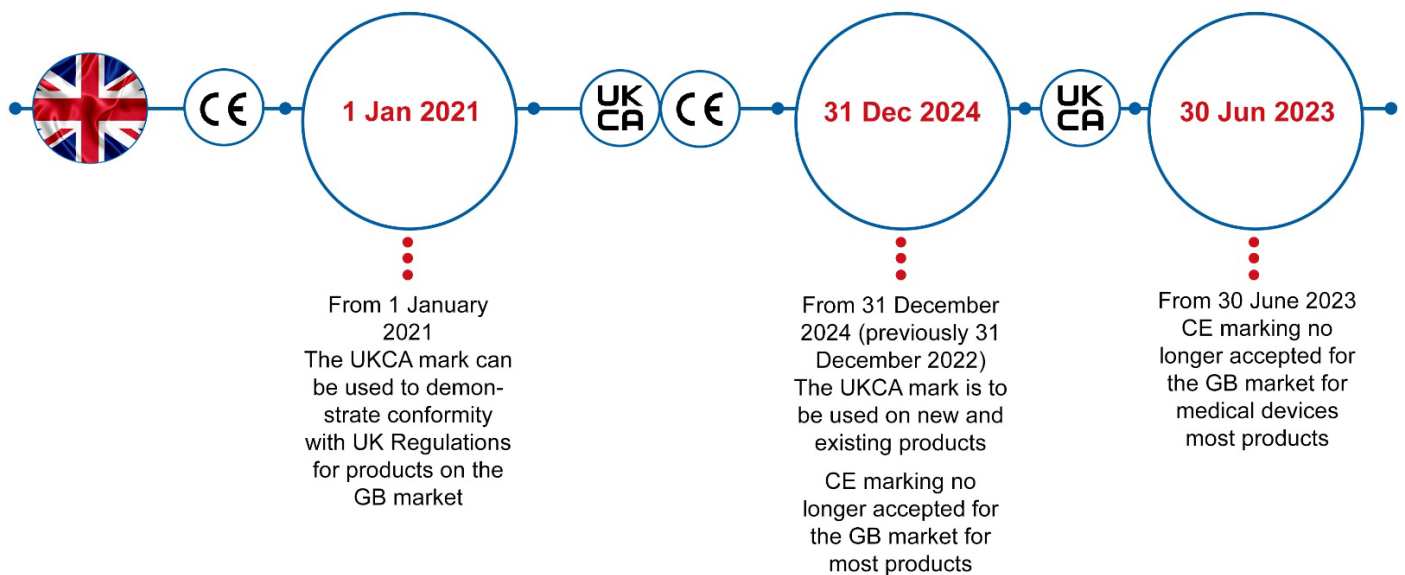

What does a UKCA Mark show?

By affixing a UKCA mark to a product and placing it onto the GB market, the manufacturer is stating that the product meets the UK Regulations.

When does the UKCA Mark come into force?

The UKCA mark will be used to replace the CE Marking requirements for products being placed on the GB market from the 1st January 2021. For most products there is a transitional arrangement for acceptance of CE marking until 31st December 2024 following the announcement of an extension.

CE Marking

We can provide testing and guidance to help you with the CE marking process to European standards and directives for European market access.

CE marking is a legal requirement for most products sold in Europe, Kiwa Electrical Compliance can help [manufacturers](#) and [importers](#) correctly [CE Mark](#) their products before placing them on the market.

It is important to ensure that you are not only technically compliant with CE marking European Directives but also your technical documentation and [Declaration of Conformity \(DoC\)](#) are correct, to be compliant with the legislation.

Whys it necessary to CE Mark?

It is a legal requirement to demonstrate that products falling within the scope of the directives that apply to it meet these requirements. When the CE Mark is affixed to a product it is an indication of a product's compliance with relevant EU legislation and benefits from free circulation in the European market.

How we can help?

We can guide you through the CE marking process by:

Providing you with a wide range of test services to obtain full compliance.

Helping you determine which European (EU) Directives and (EN) Standards apply to your products.

Helping you identify which products should be tested if you have more than one e.g. a range of similar products.
