Original Approval certificate essential for Approval renewals

SDPPI in Indonesia has required that the original Approval certificate should be included in the application dossier for Approval renewals. In the past, it was possible to provide a declaration confirming that the original Approval certificate is lost, however, this path is no longer accepted.

Now, where the original Approval certificate cannot be provided, the Authority will charge for reprinting it, prior to issuing the renewal certificate.

Please keep the original Approval certificate safe for submission with renewal applications.
