

Regulatory Update

GSM / UMTS Sample Requirements in UAE

UAE Telecommunications Regulatory Authority (TRA) has confirmed new mandatory Approval requirements for devices containing GSM / UMTS voice and/or data technology.

For Approval to be issued two functional (or “as-sold”) samples should be submitted in support of the application together with Manufacturer IMEI Certificate; the samples are for inspection purposes only.

Samples will not be returned by TRA after inspection has been concluded.

Please note this requirement is only applicable for new Type Approval applications; renewal applications are exempt from this requirement.

As this is a new requirement, lead time is expected to be up to 8 weeks for all new applications being submitted to TRA. This will affect the following upcoming Moto projects:

Nimbus WAN, Indica and Castor (MC67NA)
