

Regulatory Alert - Chile

Allocation of 5470-5725MHz – impact on already approved devices

Further to PCS' Regulatory Alert dated 24th January 2017 concerning modifications made to Type Approval Regulation Resolución 755, Chilean Regulator *Subsecretaría de Telecomunicaciones* (SUBTEL) have confirmed that following the allocation of 5GHz band 3 (5470-5725MHz), the impact to already-approved devices is as follows:

- For already approved devices and for which 5470-5725MHz has been disabled, these will not be permitted to operate on this band. If manufacturers wish to update Approvals to include operation on 5470-5725MHz, SUBTEL have confirmed that a new type approval application must be submitted.
- For models approved before 2016 and prior to the enforcement of the supplementary test report requirement, standard EU/FCC test reports can be submitted without modifications (and without the need for a supplementary test report) if manufacturers wish to apply for a new type approval application to include operation on 5470-5725MHz.
