

# Regulatory Alert – Israel

## Removal of RF Type Approval Requirements for Simple Radio Products

The Israeli Regulator for Radio Approvals the Ministry of Communications (MoC), has advised via a Free Import Regulation letter dated 21<sup>st</sup> January 2017 that they will be no longer issuing Type Approval certificates for simple wireless communication technologies.

The following equipment no longer requires Type Approval by the MoC:

- 1) Equipment **ONLY** operating with Bluetooth (BT) technology.
- 2) Equipment **ONLY** including a receptor for satellite broadcasting to determine geographical location in systems such as GPS or GLONASS.
- 3) Equipment **ONLY** operating in the technologies listed in both **1) & 2)**

If a device contains Bluetooth / GPS or GLONASS receiver technology, along with any other technology, such as WLAN, it remains mandatory to apply for Type Approval at MoC.

Please note, this change of policy is for the radio regulations only.

EMC and Safety Approval from the Standards Institute of Israel (SII) should still be obtained as before.
