

Regulatory Alert – Rwanda

Discussions ongoing at Regulator in Rwanda – no Approvals currently accepted for international applicants

PCS has been advised that the Regulator in Rwanda (RURA) has been holding internal discussions regarding future changes to be made to the regulatory framework. During this discussion period, RURA are not accepting Type Approval applications or issuing Approval certificates for any international applicants.

This decision has arisen in an attempt to discourage incompliance and assure surveillance of devices being sold within the Rwandan market.

PCS opposes the Regulator's decision to suspend Type Approvals for international applicants, as no official information has been released or published online by RURA to confirm this development and international applicants have not been duly forewarned.

It is currently unknown when the discussion period at RURA will be finalized. PCS will continue to keep all customers informed on any future developments of changes regarding this matter.
