Regulatory Update

Nepal – LTE 1800 MHz band is licensed

On 29th December, 2016, Nepal Telecommunication Authority (NTA) issued a public notice informing that NTA has authorized Nepal Telecom to operate 4G/LTE through technical neutral operator in 1800 MHz band.

It is confirmed that manufacturer could apply for a Letter of Amendment to include the new band for devices which are already Approved in Nepal and can support LTE 1800MHz band. A signed frequency declaration letter along with a technical document mentioning frequencies and power levels are required for submission. PCS are able to support customer in obtaining the LoA upon request.

Other mobile operators in Nepal are also in the process of getting authorization for operating technology neutral 4G/LTE in the near future.

PCS will continue to monitor all developments and further updates will be provided once additional information is obtained.
