# Regulatory Update

July 2013

## **ictQatar – Approval Certificates now valid indefinitely**

Qatari Regulatory Authority, ictQatar, has recently confirmed that their Type Approval regulations published in 2011 are now in force and as such several changes to their Type Approval procedure are now implemented.

Moving forward, there are 2 possible procedures to obtain Approval in Qatar:

### **1. Simplified procedure**

This procedure can be followed if one of the below criteria can be met:

- i) the product has already obtained Approval in Bahrain, Saudi Arabia or UAE
- ii) the product has already obtained Approval with a recognized CAB (see appendix A below)

The Authority advises that under the simplified scheme, certificates will take 5 working days to process.

### **2. Standard procedure**

This procedure must be followed if Approval has not been issued by a recognized National Regulatory Authority as detailed above. Nevertheless, ictQatar will only accept test reports issued by a recognized test lab (see appendix B below).

The Authority advises that under the standard scheme, certificates will take up to 15 working days to process.

All certificates issued by ictQatar, including those issued previously, are now valid indefinitely.

For additional information on the above article please contact:
