

Regulatory Update

Vietnam – Additional EMC tests required from 5th May 2014

The new Circular 05/2014/TT-BTTTT issued by Vietnamese Type Approval Authority MIC (Ministry of Information and Communications) will come into effect on 5th May 2014.

Under this Circular, all RF transmitters between 9kHz to 400GHz with power greater than 60mW will be subject to additional test to the Vietnamese EMC standard QCVN 18:2010/BTTTT (in accordance to EN 300 339:1998, IEC 61000-4).

This new Circular will replace the Circular No. 20/2011/TT-BTTTT July 1, 2011, Circular 31/2011/TT-BTTTT October 31, 2011, and Circular 32/2011/TT-BTTTT October 31, 2011.

MIC has not issued any official notification on whether products previously approved will need to be re-approved under QCVN 18:2010/BTTTT though it is expected that existing Approvals will remain valid until their expiry. PCS will keep following up on this and further details will follow accordingly.
