Regulatory Alert - Mexico

NOM-121-SCT1-2009 to expire on October 19th 2015

The NOM-121-SCT1-2009 regulation which applies to devices which operate in the frequency bands 2400-2483.5MHz, 5725-5850MHz and 902-928MHz, will expire on October 19th 2015.

Once the NOM-121-SCT1-2009 regulation expires, it is estimated that there will be a 2 month delay until a new NOM regulation is issued.

From October 19th 2015, and until the new NOM regulation is issued, it will not be possible to file any new Type Approval applications for products working in the 2400-2483.5MHz, 5725-5850MHz and 902-928MHz bands.

Manufacturers are therefore advised to accelerate all Type Approvals so that submission to the RF Authority, IFT (Instituto Federal de Telecomunicaciones) takes place before the existing NOM-121-SCT1-2009 regulation expires on October 19th 2015.

PCS understands that there will be no impact to any devices Approved in accordance with NOM-121-SCT1-2009 before October 19th 2015. All such Approvals will remain valid and import can continue.

PCS has been advised that further discussions are taking place at the IFT over the coming weeks. A further Regulatory Update with more information will be provided shortly.
