

Regulatory Update

01 September 2015

South Korea – Lithium Ion Battery – Requirements

Following amendments to the Electrical Appliances Safety Control Regulation, the requirement to test and approve all Lithium-ion type batteries, regardless of Energy Density value (Wh/L) has been announced and is due to take effect from 1st April 2016.

Prior to this regulation taking effect, batteries with an Energy Density greater than 400Wh/L only would require testing and approval.
