Regulatory Update - Ecuador

57-64GHz now permitted for use

At the end of February 2016, the Ecuador Regulator, *Agencia de Regulación y Control de las Telecomunicaciones* (ARCOTEL) released Resolución 03-02-ARCOTEL-2016, in which changes to the Ecuadorian National Frequency Allocation Plan have been published.

In the updated National Frequency Allocation Plan, ARCOTEL have allocated 57-64GHz for WLAN 802.11ad devices. As such, Type Approval applications can now be filed for devices supporting this technology.

There are no further changes to note, however PCS will continue to follow up on any other possible developments.
