

Improve your organisation's
safety awareness with the

Safety Culture Ladder

With the Safety Culture Ladder (SCL), you measure and improve safety awareness within your organisation. In this way you encourage everyone within your organisation to work more safely and consciously, reducing the number of unsafe situations and incidents.

The 5 steps of the SCL

Step 5: Progressive

Safety is fully integrated into all business processes.

Step 4: Proactive

Safety has a high priority and is continuously improved.

Step 3: Calculative

Safety rules are considered important.

Step 2: Reactive

Behavioural change is ad hoc and short lived.

Step 1: Pathological

'What we don't know, doesn't hurt us.'

Safety awareness
Open dialogue culture
Less damage Insight
Less absenteeism Higher level

5 steps to SCL certification

- ✓ Pilot audit (optional)
- ✓ Audit
- ✓ Determining level and certification
- ✓ Follow up/maintain level
- ✓ Progress to a higher level
