

# Demonstrate the circularity of your organization

## Sustainable Entrepreneurship Performance Ladder Circular

From linear production to circular entrepreneurship  
The demand for materials is high, while materials become scarce

Over 90% of raw materials entering the economy is wasted

39% of emissions can be mitigated by circular principles

To sustain our world circularity needs to be doubled

Create long-term value for resources and raw materials.

Demonstrate the impact of your organization by scoring on 7 circularity themes

The lowest score determines your position on the circular ladder

Climb the ladder and reach the highest step!

Qualify the impact of your organization

The CSR Performance Ladder Circular certificate communicates trust to your customer and shows that your organization operates according to the principles of the circular economy

Together we work towards a better world
